

# Mission-critical collaboration

A single platform for governments worldwide to securely communicate, collaborate, and manage operations.

Government agencies are under constant pressure to do more with less. Mission-oriented organizations need innovative ideas, teamwork, and alignment around shared goals.

Mattermost is a secure digital collaboration hub that helps government teams achieve mission success more reliably and quickly by providing a comprehensive real-time operational picture. Bring together mission-critical data, tools, teams, and mission partners into a single platform for decisive action and precise outcomes.

## Key benefits

### Data sovereignty & security

Maintain complete control over your data. Deploy on-premises or in a private cloud. Employ granular access controls and secure guest accounts.

### Efficiently execute prescribed processes

Customize workflows with digitized checklist-based action and integrated communication.

### Secure mobile comms

Replace personal messaging apps with secure mobile communication solutions purpose-built for national security operations.

### Align teams, tools, and processes

Connect geographically distributed team members, tools, and processes.

### Modernize operations

Transform the way your teams communicate by delivering digital workflows at scale.

### Improve cross-group collaboration

Work with stakeholders across organizations with interoperable communications between Mattermost and Microsoft Teams.

## Why governments choose Mattermost

### Security and privacy

Deploy on-premises or in a secure cloud for full control over data and security.

### Process discipline

Make processes repeatable and outcomes predictable with Playbooks.

### Flexible licensing

Use a single licensing mechanism to cover multiple networks with a single collaboration platform.

### Get up and running quickly

Leverage a rich partner network of qualified systems integrators.

### U.S. Air Force uses Mattermost to accelerate mission planning and save fuel costs

**CHALLENGES:** With a highly distributed team and heavy compliance and security demands, sharing essential communication and documents across the Department of Defense (DoD) can become a significant challenge.

**SOLUTION:** USAF deployed Mattermost on-premises, maintaining complete data sovereignty while ensuring that no third parties could access DoD data, enabling organizations to share information, ask questions, and collaborate securely.

**RESULTS:** USAF flight crews have flight plans and mission information available for review on their personal mobile devices up to 2 hours ahead of time vs. 30 minutes when using a paper-based system.
