Secure Collaboration for the Public Sector and Defense

A single platform for governments worldwide to securely communicate, collaborate, and manage operations - from public agencies to defense and intelligence organizations.

Stay Aligned and Achieve Your Mission

Government agencies are under constant pressure to do more with less. Mission-oriented organizations need innovative ideas, teamwork, and alignment around shared goals. Mattermost is an open source collaboration platform that addresses key industry challenges with:

**EFFICIENCY:** New tools and processes to increase efficiency and modernize digital operations

**SECURITY:** Communicate and collaborate securely across departments, agencies, and contractors with on-premise and secure cloud deployment options

**INNOVATION:** Adopt modern practices for agile software development and IT operations

Key Benefits

Mattermost aligns teams, tools, and processes with frictionless collaboration - a command and control center that can be adapted to workflows of any type.

<tbody>
<tr>
<td>Connect geographically distributed team members, tools, and mission-critical processes.</td>
<td>Transform the way your teams communicate, collaborate, and operate with digital processes that scale.</td>
<td>Help development teams ship better code faster with solutions designed for modern, agile processes.</td>
<td>Fix mission-critical issues fast with modern automation, runbook automation, debrief tools, and more.</td>
</tr>
</tbody>
</table>

Data sovereignty & security

Stay in complete control over your data. Deploy on-premise or in a private cloud. Employ granular access controls and secure guest accounts.

Efficiently execute prescribed processes

Customizable Playbooks with checklist-based processes, integrated collaboration, and stakeholder communication.

Trusted by Governments Around the Globe
One Platform, Three Productivity Solutions

Remove obstacles across the entire development lifecycle and give teams the visibility and control they need to manage daily processes through a single user interface with minimal context switching.

Channels Stay connected
Channel-based team communication with real-time messaging

Playbooks Trust the process
Structure processes built around checklists and accountability

Boards Hit your milestones
Kanban-style boards to manage products and projects of any size

Why Governments Choose Mattermost

Security and Privacy
Deploy on-premise or in a secure cloud for full control over data and security.

Process Discipline
Make processes repeatable and outcomes predictable with Playbooks.

Flexible licensing
A single licensing mechanism to cover multiple networks with a single collaboration platform.

Get up and running quickly
Rich partner network of qualified systems integrators.
