Make your work **flow**

An open source collaboration platform to help R&D teams align people, processes, and tools across the full software development lifecycle, all in one place.

**Ship fast and stay aligned**

Give your teams agility by removing operational obstacles:

- **Collaborate** when coding, sprint planning, deploying, and during support incidents.
- **Create**, run, update, and repeat workflows of any scope and scale across teams and tools.
- **Connect** your favorite tools and give teams visibility, automation, and control over processes.
- **Customize** your environment and workflows across the development lifecycle.

**Industry challenges**

Building and operating software is complex work. Tools are fragmented and processes can be manual and inflexible. You need to build customized workflows for effective digital operations.

- **Time:** You’re moving fast, being interrupted, and losing momentum on low-value tasks.
- **Teams:** It’s easy to lose sight of team goals in dynamic environments with information overload.
- **Tools:** Complex technology stacks and workflows result in fragile workarounds and processes.

---

**A collaboration platform built for developers**

We help you stay productive and collaborate outside of code by aligning your tools, people, and processes all in one place.

Mattermost: Three productivity tools, integrated to work seamlessly together, and aligned with three distinct workflow types across the software development lifecycle.

"Mattermost has been unimaginably effective for our company and continues to exceed expectations with every new release."

Connections

Connections are integrations with leading developer tools, including GitHub, Jenkins, CircleCI, GitLab, Jira, PagerDuty, and ServiceNow. Developers can build their own Connections through custom apps, open APIs, plugins, webhooks, and Zapier. The Mattermost App Framework allows developers to create custom interactive add-ons written in any language and run on any HTTP compatible host.

Controls

Controls give you extensive data protection, information governance, and granular identity/access controls. Deploy on-prem or in a secure cloud to meet the compliance demands of GDPR, AICPA, CCPA, FINRA, HIPAA, and more. Mattermost includes advanced mobile security, compliance auditing with oversight, and Enterprise Information Archiving integration. Customize to meet your specific requirements with fine-grained data retention, audit logs, and full access to APIs, drivers, and open source code.

Choose your deployment option

Unite your people, tools, and processes. Secure, open-source, and made for developers.
