

Power Atlassian workflows on Mattermost

Move projects faster while keeping data secure with our bidirectional Atlassian integration for Mattermost.

Your Jira workspace is mission-critical to your business. But essential project context can get lost inside the noise of inboxes, DMs, and comments across toolchains. Mattermost offers a simple, seamless, bidirectional integration with Jira for easy collaboration and quick resolution. Connect your Jira and Mattermost instances behind your firewall to maintain control over data flows.

Why Mattermost and Atlassian work better together

Scattered context slows your business down. Mattermost brings all of the information your team needs together on one secure collaboration platform with robust bidirectional integrations to Atlassian tools, increasing team efficiency.

Control your data with a self-hosted deployment

Increase collaboration without sacrificing security and compliance. Keep sensitive team conversations and files completely under your control with on-premises or private cloud deployment.

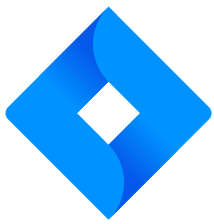

Accelerate mission-critical workflows

Enable technical teams to move quickly and stay connected by bringing context from your Atlassian tools into a collaboration environment designed for technical workflows, with custom command line tools, collaborative checklists, and task automation.

Increase reliability and response time

Improve response time and visibility by integrating Jira and Confluence into a collaboration platform. Get notifications and trigger actions and updates directly from Mattermost to help your team respond up to 90% faster.

Supercharge your Jira workflows with Mattermost

Improve focus and accelerate productivity

View, create and respond to Jira issues directly from Mattermost. Stop switching back and forth between apps.

Increase visibility and share essential context

Connect your Jira and Mattermost instances behind your firewall to maintain control over data flows.

Fast setup, easy scalability

Install and configure our pre-packaged Jira plugin in minutes. Open source code lets you adapt and scale it to grow with your team.

About Mattermost

Mattermost is the leading collaboration platform for mission-critical work. We serve national security, government, and critical infrastructure enterprises by accelerating out-of-band incident response, DevSecOps workflows, and self-sovereign collaboration to bolster the focus, adaptability, and resilience of the world's most important organizations.

Mattermost is developed on an open core platform vetted by the world's leading security organizations and co-built with over 4,000 open source project contributors who've provided more than 30,000 code improvements toward our shared vision of accelerating the world's mission-critical work.
