# Mattermost

Accelerate success with Mattermost for Microsoft Teams

Extend your Microsoft environment and achieve operational excellence with a secure digital hub for technical teams

Traditional messaging solutions often lack the automation, customization, and extensibility needed for critical business operations, leading to workflow disruptions and costly errors. Mattermost for Microsoft Teams helps create the optimal environment for every member of your team, extending your collaboration and productivity tools to mission-critical workflows while ensuring interoperability across essential tools.

Maximize your Microsoft investment

Connect your existing Microsoft Teams, M365 and Entra ID tools to a specialized workflow platform built for technical and operational teams on segregated networks.

Improve cross-functional alignment

Enhance situational awareness and support complex workflows with deep integrations with Microsoft and other 3rd party tools.

Meet security and compliance requirements

Maintain complete control and custody of sensitive data and IP in a collaboration system isolated from the primary Microsoft Teams deployment.

Pre-built Outlook calendar integration

With a two-way integration between Outlook calendar and Mattermost:

- See a daily summary of calendar events
- Sync calendar status automatically into Mattermost
- Accept or decline calendar invites

John Vu 10:40 AM
Hey I'm going to schedule a weekly sync for us to discuss ongoing projects

Microsoft Calendar BOT 10:37 AM
You have a new event request from @John Vu.

09:45 am - 10:00 am	Workflows Daily Stand-	⊘ Accept
10:00 am - 10:30 am	Customer Obsession Al	ⓘ Maybe
11:00 am - 12:00 pm NEW	PM:UX weekly sync	⊗ Decline
02:00 pm - 02:30 pm	v8.1 Release Updates & Triage	Choose response ⌄
04:30 pm - 05:30 pm	Workflows: Sprint Planning	

OneDrive integration for Office 365

Integrated OneDrive experience within Mattermost via Make or Zapier allows you to:

- Automatically upload new files or post messages in Mattermost
- Send notifications for new files & folders uploaded to OneDrive
- Upload and share files in OneDrive

User Management with Azure Active Directory

Set up Azure Active Directory (AD) for user provisioning in Mattermost:

- Sync groups to predefined roles in Mattermost
- Automatically add and remove users from channels based on AD group membership
- Assign team and channel roles to groups
- Manage and delete groups with access to Mattermost
- Use @ mentions to notify users in AD group

SSO with ADFS and Office 365

Manage user provisioning with Active Directory Federated Services (ADFS):

- Enable single sign-on to Mattermost with ADFS credentials
- Automatically federate user identities from ADFS to Mattermost, e.g. full name, email, username
- Automatically provision accounts in Mattermost for new users signing in with ADFS credentials
- Automatically manage admin access to Mattermost with ADFS attributes
- As an added bonus, Mattermost supports Office 365 SSO with support for Microsoft Active Directory Tenants.

Ready to help your technical teams thrive?

Mattermost gives technical and operations teams everything they need to work more productively and collaborate more effectively every day. Learn more and request a demo today and see the power of our secure collaboration platform:
