

Keep Your Mission in Motion.

Mattermost is the secure human-to-information interface that centralizes mission-critical tools, techniques, and procedures. Built for complete, uncompromised data sovereignty, Mattermost integrates with the tools your teams already rely on—enabling cross-functional coordination across engineering, logistics, acquisition, and command nodes, all from a single, centralized platform.

Your TTP. Your Data. Your Mission. Our Solution.

Secure by design, Mattermost provides the Warfighter expedited decision advantage and complete data sovereignty with **One Platform for Unlimited Mission Initiatives**, such as:

- Mission Operations
- DevSecOps
- Cybersecurity
- All Source Intelligence
- C4ISR
- CJADC2
- Command and Control (C2)
- Contested Battlespace
- Global Logistics
- Integration & Engineering
- Partner Nation Interoperability
- Predictive Maintenance
- RTD&E
- Training & Knowledge Management

Mattermost enables seamless system adoption without forcing teams to abandon their existing Tactics, Techniques, and Procedures (TTPs). Consolidate, expedite, and streamline collaboration practices and tooling into one platform tailored to your needs.

Mattermost Capabilities:

DATA SOVEREIGNTY

Self-hosted & fully controlled—air-gapped, IL6+, or GovCloud deployments.

OPEN SOURCE

Transparent, extensible, and auditable—trusted code with zero vendor lock-in, and JADC2 enabler.

WORKFLOW AUTOMATION

Streamline repeatable processes with Playbooks, integrations, and triggered actions.

SECURE COLLABORATION

Real-time coordination across units, commands, and coalition partners on NIPR, SIPR, or Gov networks.

MOBILIZATION & SCALABILITY

Scales from tactical teams to global operations—enabling agile force deployment in support of EUCom's forward posture, allied integration, and regional deterrence.

DEFENSE-GRADE COMPLIANCE

Built to meet DoD, NIST, and Zero Trust standards—MFA, SSO, RBAC, ABAC, and audit logging included.

U.S.-OWNED, -OPERATED, & -SUPPORTED

American-built COTS platform with U.S.-based support and supply chain integrity.

Mattermost: The Intelligent Mission Environment

Self-hosted, AI-powered collaborative workflows for Defense and Intelligence Communities

USE
CASES

Cyber Defense

SOC/CERT ops, out-of-band incident response, Red Team

DevSecOps

Dev productivity, CI/CD, platform engineering, emergency comms

Mission Operations

Zero Trust, C2 to tactical edge, joint ops, mission partner environment

APPLICATION

Secure Collaborative Workflow

Messaging collaboration across web, desktop and mobile with file sharing, audio/screenshare, workflow automation, issue tracking, bots, agents and open API access integrating into modern tool chains and legacy systems with advanced customization and security controls

Messaging Collaboration

Mattermost Channels for communication and automation

Workflow Automation

Mattermost Playbooks for automating SOPs

Audio & Screenshare

Mattermost Calls for real-time calling and screenshare

Project Tracking

Mattermost Boards for Kanban & work management

AI Bots, Agents & Open APIs

Mattermost Copilot & integrations for AI assistance

Desktop, web, mobile & Microsoft Teams apps experiences

Extensible open-source architecture

INTEGRATION

Integration Platform

Operational extensibility with pre-packaged, source available connectors, automations and templates for rapid and effective systems integration

Cyber Defense Integrations

DevSecOps Integrations

Mission Ops Integrations

Video Meeting Integrations

Compliance Integrations

AI models supported via OpenAI APIs

DEPLOYMENT

Sovereign, Cyber-Resilient Deployment Platform

via Kubernetes-based auto-scale, auto-heal integration with private & gov clouds*

Open-source development & deployment platforms

Cloud Platforms

Local
Datacenter

* In addition to "target state" K8 deployments, Mattermost offers entry-point configurations for evaluation, legacy air-gapped and commercial on-demand SaaS deployment options

The appearance of U.S. Department of Defense (DoD) visual information does not imply or constitute DoD endorsement.
