

About Mattermost

Mattermost puts your mission in motion with secure collaboration built for complex environments.

We're committed to enabling mission-critical teams to focus on what matters most.

Founded in 2015, Mattermost is a leader in workflow collaboration and automation. The company is dedicated to empowering defense and critical infrastructure organizations with **focused, adaptable, secure, and resilient collaboration solutions**. The company operates remotely, embracing a distributed workforce culture and building software that values privacy, extensibility, and security.

Collaboration designed for mission success

The Mattermost platform is purpose-built to meet the custom needs of rigorous and complex environments while offering a secure and unrivaled collaboration experience across **web, desktop and mobile with channel-based messaging, file sharing, audio calling and screen share, with integrated tooling, workflow automation and AI assistance**.

Built on open source framework with fully accessible APIs, Mattermost is designed to integrate with mission-critical tools, from popular software like Microsoft Teams, GitHub and ServiceNow, to proprietary and legacy systems.

Why the world's leading defense and infrastructure organizations trust Mattermost

Adaptable

Built on open source and fully customizable, Mattermost integrates with your systems and tools to fit your specific needs.

Focused

A dedicated workspace built to capture essential workflows and surface critical insights when moments count.

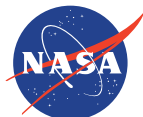

Secure

Self-hosted and private cloud deployment options and security infrastructure keep sensitive data secure and compliant.

Resilient

Designed to keep essential workflows secure and connected even when other systems are compromised.
